

STATEMENT ON LIVING BUILDING CHALLENGE MATERIALS RED LIST

The Living Building Challenge (LBC) is a voluntary program regarding the design and construction of buildings with sustainability in mind. Steel Dynamics, Inc. – Structural and Rail Division (SDI) provides the following statement regarding the “Materials” Petal of the Living Building Challenge, which contains Imperative 13’s Red List of materials and chemicals.

To the best of SDI’s belief and based upon information currently available, no chemicals or materials on the Red List are intentionally added to these finished products. Because unintentional trace amounts may be present in the recycled scrap metal used to manufacture steel products, it is possible that certain Red List chemicals including cadmium, chromium, lead and/or mercury may be present in trace amounts as impurities in our product. Any such unintentional trace amounts are exempt from listing as a Red List ingredient. Therefore, these products are manufactured consistent with the standards of the LBC’s Materials Petal. This statement does not apply to any packaging or shipping-related materials and is not intended to be an LBC “Declare” certification.

This information is provided to and may be relied upon only by the party who purchased the products directly from SDI. The information provided below is based on commercially reasonable efforts and applies as of the Policy date listed below to the specific products you are purchasing. If you have any further questions regarding the products produced by SDI, please contact the sales representative assigned to your account. We appreciate and value your business.

SDI Policy Update Effective Date: April 2024
