

## STATEMENT ON LIVING BUILDING CHALLENGE MATERIALS RED LIST

The Living Building Challenge (LBC) 3.1 provides a measure of sustainability for the design and construction of buildings in our communities. Steel Dynamics, Inc. – Roanoke Bar Division (SDI) provides the following statement regarding the “Materials” Petal of the Living Building Challenge, which contains Imperative 10’s Red List of materials and chemicals.

To the best of SDI’s belief and based upon information currently available, no chemicals or materials on the Red List are intentionally added to our product. Because unintentional trace amounts of cadmium, lead and mercury may be present in the recycled scrap metal used to manufacture our steel product, it is possible that cadmium, lead and mercury may be present in trace amounts as impurities in our product. Any such unintentional trace amounts are exempt from listing as a Red List ingredient. Therefore, our product is manufactured consistent with the standards of an “LBC Compliant” product.

This information is provided to and may be relied upon only by the party who purchased the products directly from SDI. If you have any further questions regarding the products produced by SDI, please contact the sales representative assigned to your account. We appreciate and value your business.

*SDI Policy Update Effective Date June 10, 2019*
