

**STATEMENT ON EUROPEAN UNION REGULATION (EC) No. 1907/2006
CONCERNING THE REGISTRATION, EVALUATION, AUTHORISATION,
AND RESTRICTION OF CHEMICALS (REACH)**

Steel Dynamics, Inc. – Roanoke Bar Division (SDI) provides the following information regarding European Union Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation, and Restriction of Chemicals (REACH). SDI is not regulated under REACH for its domestic shipments of steel products, but understands that its customers may benefit from having this information.

SDI understands based on European Chemicals Agency (ECHA) guidance that the steel products it supplies to customers meet the definition of “articles” under REACH. SDI has made commercially reasonable efforts to determine whether the substances included in REACH Annex XVII, REACH Annex XIV and/or ECHA’s Substances of Very High Concern (SVHC) Candidate List (Lists) are contained in its steel products above relevant concentration thresholds or scope of restrictions. The information provided below is based upon the substances included on the Lists as of the date listed below. Concentration levels are based upon the total weight of the steel products at the time they ship from SDI.

To the best of SDI’s belief and based upon information currently available, the steel products as shipped from its facility do not contain any substance on the Lists above the relevant concentration threshold or beyond the relevant scope of restriction.

This information is provided to and may be relied upon only by the party who purchased the products directly from SDI. If you have any further questions regarding the products produced by SDI, please contact the sales representative assigned to your account. We appreciate and value your business.

SDI Policy Update Effective June 10, 2019
